

## **FULL RISK DISCLOSURE**

The information in this section of this website is not intended for retail customers.

Forex, Futures, Options on Futures, Spread Betting, CFD and other leveraged products involves significant risk of loss and many not be suitable for all investors. Products that are traded on margin carry a risk that you can lose more than your initial deposit. Increasing leverage increases risk. Before deciding to trade any products offered by firms under the Dinosaur Group Holdings, LLC group of companies, carefully consider your financial objectives, level of experience & risk appetite. Spot Gold and Silver contracts are not subject to regulation under the U.S. Commodity Exchange Act. If you are trading Futures or Options on Futures, please read Characteristics and Risks of Standardized Options.

The risk of loss in trading futures contracts or commodity options can be substantial, and therefore investors should understand the risks involved in taking leveraged positions and must assume responsibility for the risks associated with such investments and for their results. There is considerable exposure to risk in any off-exchange transaction, including, but not limited to, leverage, creditworthiness, limited regulatory protection and market volatility that may substantially affect the price, or liquidity of the markets that you are trading.

Moreover, the leveraged nature of forex, spread betting and CFD trading means that any market movement will have an equally proportional effect on your deposited funds. This may work against you as well as for you. The possibility exists that you could sustain a total loss of initial margin funds and be required to deposit additional funds to maintain your position. If you fail to meet any margin requirement, your position may be liquidated and you will be responsible for any resulting losses.

Dinosaur Financial Group, LLC employs backup systems and a contingency plan to minimize the possibility of system failure, and trading via telephone is always available.
